DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Lansky et al. The solenoid contact is readable on element 28 and the valve block contact element is readable on element 14. The electrical cable is readable on element 11. The valve block housing is readable on elements 3 and 4. The central plug-in unit is readable on element 12 and element 1 is readable on the electrical control solenoid unit. Element 48 is readable on the housing sleeve that encloses the winding 20 and 22. The tubular frames are defined by element 34' for receiving the pins 14 and 28.
